

ZM Spray Nozzle

100% THERMAL PERFORMANCE

WITH

ZERO MAINTENANCE

EVAPCO is proud to offer the latest innovation in Evaporative Cooling Technology; the **ZM Spray Nozzle**...designed for End-Users who want *100% Thermal Performance* from their Evaporative Condensers with **Zero Nozzle Maintenance**.

The unique design features of the **ZM Spray Nozzle** eliminate the need to repair and replace expensive rotating nozzles.

Maintenance-Free Design

- The **ZM** is a **Fixed Position Nozzle** with **NO MOVING PARTS**. There is no wear and tear on steel springs and hardware.
- The large nozzle opening, 1-5/16" (3.4cm) diameter and clearance between the bottom of the nozzle and water diverter plate, 1-1/2" (3.8cm) allows the largest debris to flow easily through the **ZM Spray Nozzle**.

Additional Design Features

- **Fewer Spray Nozzles Required!**
The superior **ZM Spray Nozzle** design allows for a 75% reduction in the number of nozzles required...while maintaining 100% Thermal Performance.
- **Durable, Long-Lasting Design!**
The **ZM Spray Nozzle** is molded from heavy-duty, glass reinforced nylon for long life and 100% corrosion resistance. The **ZM Spray Nozzles** will last as long as your Condenser, or EVAPCO will replace them at no cost.
- **Keep it Simple!**
With **No Moving Parts**...routine nozzle inspection, emergency maintenance repairs and unscheduled system downtime is eliminated.
- **Replacement Spray Distribution Systems Available!**
Replace worn, inefficient spray nozzles with **NEW ZM Spray Nozzles**. EVAPCO has developed easy to install retrofit systems for other manufacturers' Evaporative Condensers to provide 100% spray water coverage, improve equipment performance and eliminate nozzle maintenance.
